Hi John,

I am in Middlesex Superior at 9:00am and in Brockton Superior at 2:00pm today. When I get back to the lab I will pull the drug powder sheet and make sure of the calculations.

Thanks,
Annie

Annie-you did the cert on this on June 9. 19 bags of crack, net weight .61 grams based on an extrapolation of 5 bags.

Seem light to me (should be a couple of grams or so). Could you check the file and make sure that the extrapolation was done? Sure it was and the stuff was just light, but wanted to be sure before I turn it over.

Thanks.
